

# NPS ADVISORY

## Physician Practices are Encountering More Complex Information Technology Challenges.

Our Physician-led IT consultants offer results-oriented solutions for HIT Planning and Implementation.

### Technology Experts Who Understand the Physician Practice

Healthcare information technology (HIT) systems have become essential to day-to-day operations in physician practices. With the emergence of ACOs, meaningful use and consumer-driven health plans, practices' are adopting programs that require more complex operational strategies. Successfully planning and implementing these new strategies can be challenging, especially considering medical

groups are focused on caring for patients as their top priority.

To meet the new demands of physician practices in today's IT-centric healthcare market, NPS offers valuable results-oriented solutions delivered by a team of consultant experts. Our team is dedicated to understanding your practice IT goals and outlining a measurable action plan.

#### How Can We Help?

NPS is a physician-led technology company solely focused on HIT. Our consultants, who are experts in the strategic planning and implementation of healthcare information systems, are comprised of top technical and medical professionals dedicated to the performance, security and integrity of your healthcare information systems.

#### How Will You Benefit?

Through years of experience, we have developed a consulting methodology for practice optimization with a holistic approach to people, HIT and workflow processes across the practice. We call it the Perfect Practice Initiative. Our priority is ensuring our services and applications are aligned to not only meet your functional and technical requirements, but also the respective needs of each of your practice stakeholders.
